

FOR IMMEDIATE RELEASE: 10/9/2010

Mimelight showcases its first interactive lighting product **Quantum Pearl** in London and Berlin, September 23rd 2010.

Quantum Pearl will be launched at the Design Show Tent in London and simultaneously in Berlin at Das Direktorenhaus, a gallery merging art and craft methods with analogue technology and digital media.

Quantum Pearl is an interactive wall mounted multicolour LED light. The light is controlled by simple hand gestures and produces an infinite range of modulating colour fields.

Quantum Pearl utilises seven high-power energy-efficient RGB LEDs, proximity sensing technology and a powerful microprocessor with custom software. It has DMX and MIDI capability, enabling networking and sound generation.

Mimelight

Mimelight has been established as a vehicle for the commercial development of interactive lighting products, the first product being Quantum Pearl.

Its designer, Richard Brown, is an artist, inventor and entrepreneur who creates interactive and mimetic experiences. His work encompasses ideas from cybernetics, artificial life, interaction design, emergence, complexity and alchemy.
